To

The Registrars/Presidents of all State Pharmacy Councils

The Principals/Directors of PCI Approved Pharmacy Institutions

Sub: Awareness and Student Participation in United States Pharmacopeia (USP) Education Learning Management System (LMS) Courses.

Ref: Item No.1 of 446 EC (31st May, 2026)

Sir/Madam,

The Pharmacy Council of India (PCI), as the national regulatory body for pharmacy education and profession in India, continuously strives to strengthen pharmaceutical education, improve industry readiness among pharmacy graduates, and promote global quality-oriented learning opportunities for students and faculty members.

India possesses one of the world's largest pharmaceutical education ecosystems and continues to play a major role in global pharmaceutical manufacturing and supply of medicines. However, several published studies, government reports, and industry assessments have highlighted the continuing need to further strengthen practical exposure, pharmaceutical quality systems understanding, regulatory awareness, data integrity practices, and global compliance knowledge among pharmacy students in alignment with evolving pharmaceutical industry expectations.

In view of the above and considering the growing importance of globally harmonized pharmaceutical quality standards, the Pharmacy Council of India appreciates the educational initiatives being extended by the United States Pharmacopeia (USP) through its Education Learning Management System (LMS) platform for pharmacy academia and students in India.

USP is an internationally recognized scientific organization dedicated to advancing public health through quality standards for medicines and healthcare products globally. USP educational programs are widely utilized across pharmaceutical industries, regulatory environments, and academic institutions worldwide.

USP Education LMS offers self-paced digital learning opportunities covering several important pharmaceutical quality and regulatory domains.

The Pharmacy Council of India encourages all pharmacy colleges, universities,

and students to avail themselves of the learning opportunities available on the USP Education LMS platform through the following web link/ QR Code:

<https://www.usp.enhanzed.com>

The objective of this initiative is to support pharmacy students in gaining additional exposure to globally relevant pharmaceutical quality systems and industry-oriented competencies which may help strengthen Industry readiness, Employability skills, Pharmaceutical quality culture, Regulatory awareness, Documentation and compliance understanding, Knowledge of global pharmacopeial standards

Institutions are requested to disseminate this information among students and encourage interested students to voluntarily register on the USP LMS platform and avail the complementary courses currently being offered by USP for pharmacy academia.

Students who successfully complete courses may receive course completion certifications/co-branded certificates where applicable. Additionally, considering evolving pharmaceutical industry needs and student interests, learners may also explore advanced paid courses available on the USP LMS portal for further professional development.

Additionally, institutions/Universities should consider integrating USP educational content into their own curricula through USP's generous licensing program. This program enables university faculty to deploy up-to-date content without the high costs of developing and maintaining it themselves. PCI believes such collaborative educational initiatives can contribute significantly toward building a future-ready, globally competent, and quality-oriented pharmaceutical workforce for India.

All institutions are requested to extend necessary support in creating awareness among students and faculty members regarding these opportunities.

Further details regarding course availability, registration, and learning opportunities may be accessed through the USP Education LMS platform or by contacting getindia@usp.org.

Yours faithfully
