PHARMACY COUNCIL OF INDIA

(A Statutory body under Ministry of Health and Family Welfare, Government of India)

Celebrating **PHARMACISTS DAY** 25th September, 2023

Pharmacists strengthening health systems

"Angdaan Mahadan"

PHARMACY COUNCIL OF INDIA CELEBRATES PHARMACIST DAY 2023 !

On this day, we honor pharmacists for their contributions to patient care, Medical Industry and involved in Developing and Manufacturing Pharmaceutical goods. This year's Pharmacist Day theme is " Pharmacists strengthening health systems- Angdaan Mahadan " draws attention to the important connection between patients' health outcomes. The profession can be promoted and the vital contribution provided by pharmacy professionals in enhancing global health outcomes can be honored by celebrating Pharmacists Day.

PHARMACY: A LIFESAVING PROFESSION

Pharmacist is a specialized Healthcare Professional who is involved in Preparation, dispensing, and management of safe and effective use of medications, while also providing medication counseling and guidance to patients and primary healthcare providers to the community.

Pharmacy stores are the centers where a pharmacist can practice and make the community aware for rational and safe use of drugs by dispensing prescription medications and make the public aware for the safe use of medications.

PHARMACIST: THE HEALTHCARE PROVIDERS

Since several decades, pharmacists have provided care for transplant recipients, and an expanding body of research demonstrates the positive effects of clinical pharmacist care on key patient outcomes. Hence the PCI has decided to celebrate "Pharmacists Day" on 25th September, 2023 to spread awareness amongst public and health care professionals about the vital role of pharmacists in the healthcare delivery system.

In a world where every heartbeat matters, there is a profound opportunity for each of us to make a life-altering difference. Organ donation is not just a noble act; it's a lifeline for those who await a second chance at life. By taking this pledge, you can become a beacon of hope and an embodiment of compassion. You join a community of heroes, individuals who are willing to make the ultimate sacrifice to save another's life. Your decision can bring light to the darkest moments for someone in need. Together, we can make our country a place where the gift of life is readily available to all who seek it. Organ donation is the ultimate gift one can give. It can save multiple lives and restore health and happiness to families.

This Pharmacist Day, you may pledge to donate your organs by signing up within the website www.notto.nic.in and register yourself as donor or for offline registration.

Pharmacist Role in Patient care

Trust is a central part of all Human relationships, and the fundamental element of social capital. Pharmacists plays a critical role in clinical settings to improve important patient outcomes. Since many years, pharmacists are involved in patient care and raising awareness about the maintenance of good healthcare systems.

Pharmacist Role in Patient care

Trust is a central part of all Human relationships, and the fundamental element of social capital. Pharmacists plays a critical role in clinical settings to improve important patient outcomes. Since many years, pharmacists are involved in patient care and raising awareness about the maintenance of good healthcare systems.

Key areas Pharmacists involved in:

1. Organ transplant patient care.
2. Promote awareness amongst the society to maintain good Health.
3. Patient care and Counselling.
4. Manufacture of safe and effective Medicines.
5. Dispensing and filling up Prescriptions.
6. Manufacturing of safe and effective medicines by following Good Manufacturing Practices.

Pharmacists around the world are contributing significantly to the delivery of pharmacological care services in many parts of the world. Additionally, it is widely accepted that pharmacists may contribute significantly to the delivery of primary healthcare, particularly in underdeveloped nations. Their function varies over the world; some are involved in the manufacturing and distribution of medications, while others concentrate on imparting pharmacological knowledge to medical professionals, nurses, and patients.
